Wascomat	WASCOWASH	7.50			

Asterisks (*) indicates that a coding variable may be used in place of the asterisks to indicate a color or feature that does not affect washer efficiency. The California Urban Water Conservation Council and participating water supply agencies do not guarantee materials or workmanship; acceptance of such is the customer's responsibility. Water Factor = Number of gallons needed for each cubic foot of laundry. A lower number (water factor) indicates lower consumption and more efficient use of water. Information compiled from CEE's Commercial Family-Sized Clothes Washer Qualifying Product List.
